

Happy Holidays

It's been a special year for the global team at Vectronic Aerospace. In the past weeks, we took time to reflect together and be reminded of how appreciative we are for our loyal employees and customers. Most impressive, our teams in Germany, Canada, Finland, and the United States supported more wildlife research projects than any year in our company's history.

We are privileged to continue our work as the responsive, client-focused, and animal welfare partners our clients seek when gathering their data.

Kindly note our offices will be closed 22 December 2023 through 2 January 2024 so our employees can spend time with their families for the Holidays.

MERRY CHRISTMAS
FROHE WEIHNACHTEN
FELIZ NAVIDAD
HYVÄÄ JOULUA

NEW PRODUCT RELEASE: SOLEX

Our clients are getting more battery life, more remote data and longer field deployment with Solex. Our rugged, field-tested, and solar-powered GPS wildlife monitoring technology delivers peak performance with the potential for unlimited battery life — all in a lightweight package.

Layered seamlessly inside the collar belt, flexible solar panels deliver the dependability and durability they expect from the biologists and engineers at Vectronic Aerospace.

NEW IN 2024!

We're excited to add a new online ordering platform in the coming months, making it easier to configure your collars and match the custom needs of your project. Researchers will also be able to more effectively manage their collar data with new abilities to send remote collar commands and trigger drop offs. All this and more will be included in our new release of Inventa desktop!

As we say farewell to 2023, we look forward to exciting new developments in our work for 2024. From all of us at Vectronic Aerospace, we wish you a safe, healthy, and happy Holiday season and look forward to seeing you next year.
